

Attn FCC:

In response to LPFM station service, please note that I am COMPLETELY OPPOSED to expanding this type of service. I listen to K-LOVE on 91.1FM in the Denver area. I do not listen to any other station in the Denver metro area and should K-LOVE be replaced I would not have any other station to listen to that provides contemporary Christian programming. With K-LOVE, I can be assured of good, quality and wholesome programming that positively affects me and my two small children who ride in the car with me to and from school. Our average daily commute is not less than 2 hours daily. I do not have to worry about what my children would or would not hear with this station.

I recently heard the statistic that K-LOVE receives about 1000 calls daily for help with personal issues. One such case I heard about was a woman had lost child in a car accident and didn't feel like living anymore. As she was contemplating suicide, she heard a song and felt prompted to call the station. She received advice against suicide. I firmly believe this woman's life was saved because of the programming heard on this station. I also believe that we as a community can NOT AFFORD to replace this station and the help it offers. How many in my own community could be prevented by committing suicide? My father committed suicide before this station was on the air and I am wondering if his death could have been prevented from having someone to call like K-LOVE which provides help on a 24 hour basis.

Again, please let me restate that should the K-LOVE signal in my area be replaced by an LPFM signal I will not have access to the same family friendly programming that I currently not only enjoy, but financially support on a monthly basis. Please ensure that the positive and encouraging impact many receive daily is preserved all across America. Please do NOT expand LPFM broadcasting.

I thank you in advance for your careful consideration in this matter which I find critical in the public interest.
